Gabriel Santos

Full Stack Developer · Next.js · React · Node.js · NestJS · TypeScript · PostgreSQL

Salvador, Brazil · Remote · gabrielsantos98898@gmail.com · linkedin.com/in/gabriel-santos-b53632196 · github.com/GabrielDev969 · gabrieldev969.github.io/Portfolio

SUMMARY

Full Stack Developer with about 5 years of experience: 4 as a Systems Analyst and over 1 working remotely. I build complete products, from the database to the interface: frontends and dashboards with Next.js and React, APIs with Node.js and NestJS, and data in PostgreSQL. At my current company I build the internal campaign management system and the campaign BI. I use AI tools daily to move faster without giving up technical judgment, and I am pursuing a postgraduate degree in Software Engineering for Applied AI.

EXPERIENCE

Full Stack Developer · **Group Wave Enterprise** — Remote · Aug 2025 – Present

- **Sistema Wave:** internal platform to publish campaigns, manage requests between teams (ClickUp-style), generate campaign reports and track results on a dashboard.
- **Campaign BI:** dashboards built on RedTrack data for monthly and weekly analysis and to measure each media buyer's performance by the campaigns they launched.
- End-to-end development with Next.js, React, Node.js, NestJS, TypeScript and PostgreSQL.
- Data pipelines in n8n and reconciliation in PostgreSQL to fix inflated conversion and revenue metrics.
- Pull request workflow with code review by the Tech Lead.

Systems Analyst · **Fator Sistemas & Consultorias** — Salvador, Brazil · Sep 2021 – Aug 2025

- Built and maintained systems with JavaScript, TypeScript, Node.js and Angular.
- Data modeling and queries on SQL and Firebird databases.
- Turned business requirements into technical solutions, focusing on maintainability and performance.

PROJECTS & INDEPENDENT WORK

IA Robots Solutions · 2026 – Present — consulting and development for OrionStar service robots: robot setup and Hostly, an in-house system (admin panel, VPS-hosted backend and RobotOS app) that plays scheduled campaigns and music and talks to people.

Zibby — my own multi-store e-commerce platform: monorepo with a NestJS API and a Next.js storefront and admin, PostgreSQL with Prisma, Stripe payments and Zendrop integration. Automated tests, security practices and VPS deployment, built with AI coding agents and code review before every merge.

TECHNICAL SKILLS

Frontend	Next.js, React, TypeScript, JavaScript, Angular · dashboards and internal tools
Backend	Node.js, NestJS, Express, REST APIs, Swagger · also Spring Boot and Django
Data	PostgreSQL, MySQL, MongoDB, Redis, Firebird · Prisma · RedTrack integration
DevOps & Cloud	Docker, AWS, Git
Architecture	Clean Architecture, SOLID, TDD, microservices
Automation & AI	n8n, AI tools for software development

EDUCATION

Postgraduate Degree in Software Engineering for Applied AI
UNIPDS · 2026 – 2027 (in progress)

B.Sc. in Computer Science
UNIFACS, Salvador · 2021 – 2025

CERTIFICATIONS

Node.js Training · Udemy, 2023 · NLW Unite – Java · Rocketseat, 2024 · Python & Django · Udemy, 2023 · TypeScript · Udemy, 2022
